Automatic EZ Guide™ Wafer Aligner-Escalator

This table top space conscious aligner escalator automatically notch or flat aligns the wafers and then automatically escalates the wafers to view for manual ID mark reading. The unit features a joystick to allow the operator to selected the perfect tilt angle for enhanced ID readability. H-Square's EZ Guide™ patented alignment mechanisms result in exceptional aligning accuracy. The user-friendly simple control panel and mechanical and software build in safeguards make this tool easy to use. The cost-effective design and operator visual reading provides wafer tracking at a fraction of the cost of fully automated OCR systems. The tool is designed with an ESD safe construction and is Class 1 cleanroom compatible. Each unit can be ordered with an optional LED light bank lamp with optimizes laser scribe reading without exposing photoresist. Custom designs features include LED lighting , 12 or 13 slot designs, and AET units with thin wafer lift combs. Please contact H-Square for information.
