

# SQ22766 Series Aluminum Process Cassettes

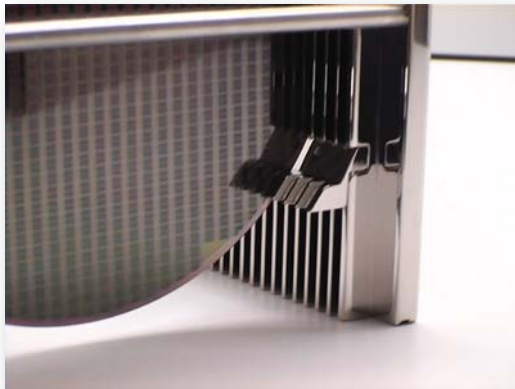

High Performance Wafer Handling Products

This custom all aluminum version of the classic 2851 and MC1 series cassette is designed for high temperature applications up to 350° C.

Aluminum wafer supports cradle the wafer from the bottom to prevent pinching of wafers caused by cassette expansion and contraction.

The all aluminum plated notched wafer support is available for our 2851 and our MC1 series, 75mm, 100mm, 125mm, 150mm and 200mm standard metal cassettes.

Please contact the Custom Products Department for other size SQ22766 wafer cassette options.

**For applications  
up to 350° Celsius**

**(for higher temperature applications please  
consider SSC series stainless steel cassettes)**
